State University
Currently pursuing
Masters in
Agricultural
Leadership,
Education, and
Communications

The Food, Agriculture and Natural Resources program at EHS is designed to teach students the fundamentals of agriculture and sustainability.

The program is excellent for students planning on going on to major in Agriculture in college but overall teaches students how to be smart consumers of agricultural goods as well as living a sustainable and productive life.

Agriculture includes:

- Horticulture Science
- Environmental and Natural Resource Management

Freshmen Courses Offered:

Agriscience (Program of Study in the Agriculture, Food, and Natural Resources Career Cluster) Agriscience is an introductory laboratory science course that prepares students for biology, subsequent science and agriculture courses, and postsecondary study. This course helps students understand the important role that agricultural science and technology plays in the twenty-first century. In addition, it serves as the first course for all programs of study in the Agriculture, Food, & Natural Resources cluster. Upon completion of this course, proficient students will be prepared for success in more advanced agriculture and science coursework. This course counts as a lab science credit toward graduation requirements.

Courses Offered

- Agriscience
- Principles of Plant Science and Hydroculture
- SDC Intro to Plant Management (Greenhouse Management)
- Small Animal Science
- Veterinary Science
- Supervised Agriculture Experience
- Work-Based Learning
- Landscape & Turf Management

Club Information:

FFA makes a positive difference in the lives of students by developing their potential for premier leadership, Personal growth and career success agricultural education.
